## Bradford Products

---

*VIP Experience Shower*

Since 1982 Bradford Products has been America's premier manufacturer of high-quality stainless steel products. We specialize in design and fabrication of pools and hot tubs, custom specialty products, day spa treatment rooms, water features, experience showers, SwimSpas®, and other aquatic vessels.

The state-of-the-art characteristics, durability and strength of our vessels are backed by our standard 25-year warranty.

Bradford Products maintains ISO 9001/2008 and IAPMO certifications and adheres to ASME, ANSI, and NSF standards. American Welding Society (AWS) standards are upheld and welding is performed by certified welders. Each product is designed and manufactured in coordination with the designer, architect, construction manager or others as applicable.

Bradford works with the commercial and high-end residential sectors, including:

**Hotels**

**Resorts**

**Destination Spas**

**Casinos**

## Creating Your Spa

---

Bradford Products is leading the way in one of the fastest growing and most exciting industries in development. We currently serve as a reference and provider of quality equipment, design, architecture, and treatment styles for Spa Resorts around the world. We design and engineer a variety of products and entire spaces imagined by spa consultants, hoteliers, and architects. As the world's spa industry changes, innovation has become an essential core value at Bradford. Each spa project has different ways of achieving its unified goal of delivering well-being for body, mind, and spirit

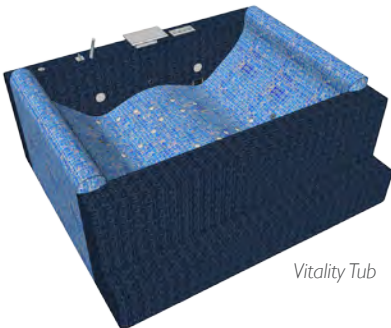

*Ice Fountain*

motivated by prevention and care.

Guests around the world enjoy being surrounded by dazzling new environments and exotic treatments, and this encourages the hospitality industry to create luxurious spas as an addition to their amenities.

# Bradford's Spa Experience

---

SteamRoom® Concept

Four Seasons - Baltimore, MD

The very best in design is grounded in great functionality. This is how the expertise of our aquatic engineering and structural fabrication connects imaginative design with direct functionality. Bradford considers the aesthetics, safety, and practical usability of every product or room we contribute to your environment.

Encore - Las Vegas, NV

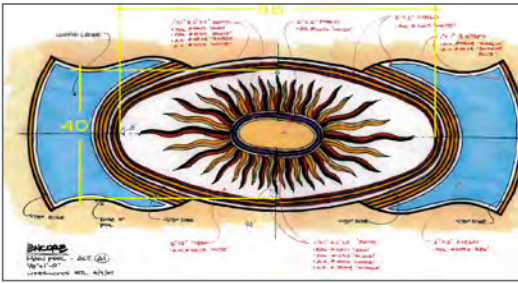

Northern Quest Resort - Spokane, WA

We partner with you to integrate our custom products into your existing project to create new environments. We contribute to the design of your features based on cultural, geographical, and historical factors. Architectural functions such as lighting, walking space, surface reflection, and seating forms are always considered in the design process.

# Pools & Hot Tub

Choosing the right shape, size, and style for your pool or hot tub has never been easier. Bradford custom designs and manufactures sizes and styles to suit all applications. We have designed and manufactured large resort pools, unique Roman tubs, hot tubs with reclined seating, herbal tubs, vitality tubs, and plunge pools. Stainless steel's durability and hygienic nature make our pools an ideal choice for day spas, hotels, or resorts. With a vast range of tile colors and styles to choose from such as ceramic, stone, marble, travertine, Byzantine, and glass mosaic tile, our vessels can be finished to match existing décor and color schemes.

Installation of the Encore pool - Las Vegas, NV

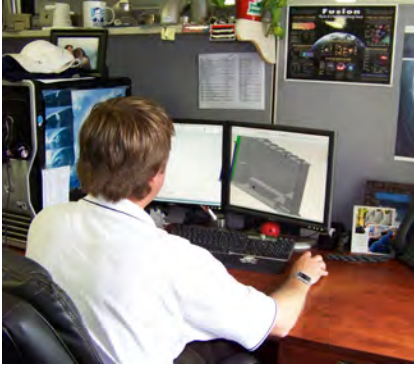

*Incorporate a custom design for fully tiled vessels, or choose an all-stainless finish for a sleek elegant shine.*

# Bradford Process

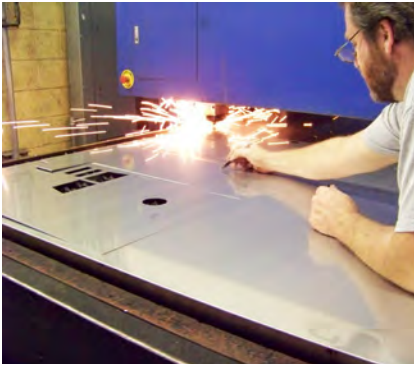

---

Product design & engineering

In-house or on-site welding

CNC laser cutting

In-house or on-site tiling

Plate rolling, plate shearing  
& brake forming

Craning whole vessel or large sections into  
place for elevated installations

## Why Stainless Steel?

---

Four Seasons - Baltimore, MD

The Cosmopolitan - Las Vegas, NV

Nevada Cancer Center - Las Vegas, NV

The longevity and durability of stainless steel is also widely known for its hygienic, nonporous finish. You can depend on the structural integrity of your product since it will not peel, crack, swell or lose any tile during long-term exposure to moisture and on-going temperature changes. Additionally, on-site installation time is shortened since the pre-fabricated vessels or pieces can be lifted into place.

# Stainless Steel a Greener Option

---

Mandarin Oriental - Las Vegas, NV

Bradford Products is proud to provide a green solution that meets all your pool and hot tub needs. Our products are manufactured in the U.S. with environmentally conscious practices and materials.

Stainless steel is one of the most environmentally responsible and sustainable materials used in manufacturing today. At the end of its long life cycle, stainless steel will be 100% recyclable. Stainless steel itself requires minimal maintenance compared to other typical pool or hot tub finish materials. In addition, significantly fewer chemical cleaners and treatments are required for such vessels.

The environmental benefits of stainless steel are one of many factors that permit LEED certification, and help to keep sustainability at the forefront of your design!

\*applies to specific vessels

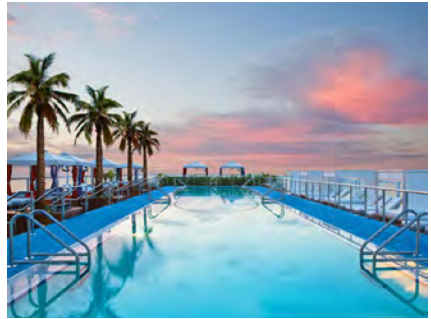

# For All of Your Aquatic Needs ---

With thousands of first-class installations around the world, Bradford is the first and best choice for your next upscale project. With installations throughout the U.S., South America, the Middle East, Europe, the Caribbean, and the South Pacific, Bradford is experienced and mobile. Bradford Products has the solutions for even the most challenging projects.
